7th International Workshop on “Financial Markets and Nonlinear Dynamics” (FMND), 1-2 June 2023, Paris (France)

The Society for Nonlinear Dynamics and Econometrics
7th International Workshop on “Financial Markets and Nonlinear Dynamics” (FMND), 1-2 June 2023, Paris (France)

With the collaboration of the International Association for Applied Econometrics (IAAE), the Society for Nonlinear Dynamics and Econometrics (SNDE), the Institute for Nonlinear Dynamics Inference (INDI), the French Finance Association (AFFI), the IAE Lille University School of Management (LUMEN), Aix Marseille School of Economics and these Journals:
7th International Workshop on “Financial Markets and Nonlinear Dynamics” (FMND), 1-2 June 2023, Paris (France)

Keynote Speakers

Prof. John Y. CAMPBELL (Harvard University, the USA)
Prof. Cheng HSIAO (University of South California, the USA)
Prof. Nour MEDDAHI (Toulouse School of Economics, France)

Chairs

Prof. Gilles DUFRENOT (Sciences Po Aix, France)
Prof. Fredj JAWADI (University of Lille, France)

Co-sponsors:
International Association for Applied Econometrics (IAAE)
The Society for Nonlinear Dynamics and Econometrics
IAE Lille School of Management -LUMEN

Scope of the Workshop

In the aftermath of the 2008/2009 global financial crisis, several international capital markets experienced severe losses. Further, since March 2020 and within the coronavirus crisis (COVID-19), the financial markets have been again impacted significantly in particular because of the lockdown decisions in different developed and emerging countries, the slowdown of major economies, etc. Indeed, these recent events -induced basically by a COVID-19 shock - have generated an economic shock, increased uncertainty, and impacted investor’s anxiety and therefore financial market dynamics. This volatility of financial markets has recently increased because the inflation tension, the uncertainty about the new central banking, commodity markets and the geopolitical tensions. In order to limit these losses, ensure investors and improve risk control, governments and central banks have proposed different solidarity programs and aids and have conducted new on-going policies.

The financial market authorities adopted always regulatory measures to strengthen the financial systems, control algorithm and flash trading, improve market organization, and advance risk management. The availability of high frequency market data and the development of recent econometric models are of real interest in assessing the efficiency of these new regulatory measures, to test their appropriateness and to assess for the effects of
these shocks on the financial markets. Moreover, this can also help identify the main characteristics of the financial market data, resolve the issues raised by high frequency data, improve the understanding of price formation, and assess the risk dynamics.

The aim of the workshop is to discuss innovative econometric modeling approaches that can serve as valuable frameworks to deal with these issues, with a particular interest for nonlinear time series models and recent econometrics modeling. The workshop aims at bringing together academics and professionals (economists, financiers, and econometricians) to discuss these issues and to present their recent theoretical and empirical findings. It will also serve as a valuable platform for discussing innovative and thought-provoking ideas on nonlinear high frequency data modeling.

We are looking for papers that might include (but are not restricted to) theoretical, experimental and empirical research in finance and/or econometrics in the following areas:

This international workshop includes plenary sessions, parallel sessions and PhD student sessions.

**Submission Process**

Authors are invited to submit a full paper -in PDF format and in English-, via the workshop website: [http://fmnd.fr/submit-your-paper.html](http://fmnd.fr/submit-your-paper.html) or by email to: [mm2012@gmail.com](mailto:mm2012@gmail.com). The complete version of the paper should include the following information: title, name(s) of the authors, abstract (max 200 words), keywords, JEL classification, e-mail address for each author, complete address for the corresponding author.
Scientific Committee

C. Alexander, University of Sussex, the UK.
H. Amman, University of Amsterdam, The Netherlands.
Y. Ait-Sahalia, Princeton University, the USA.
W. Barnett, University of Kansas & Center for Financial Stability, New York, the USA.
T. Bollerslev, Duke University, the USA.
D. Bourghelle, IAE Lille University of Management, France.
R. Bu, The University of Liverpool, The UK.
J. Campbell, Harvard University, the USA.
M. Chauvet, University of California Riverside, The USA.
T. Chordia, Emory University, the USA.
J. G. Cousin, IAE Lille University of Management, France.
S. Dereeper, IAE Lille University of Management, France.
G. Dufrénot, Sciences Po Aix, France.
Th. Foucault, HEC Paris, France.
Ph. Franses, Erasmus University, The Netherlands.
P. Grandin, IAE Lille University of Management, France.
C. Gresse, Université Paris-Dauphine, France.
K. Hadri, Queens University Belfast, the UK.
J. Hamilton, University of California, San Diego, The USA.
S. Hall, Leicester University, the UK.
C. Hsiao (University of South California, the USA).
F. Jawadi, IAE Lille University of Management, France.
K. Juselius, University of Copenhagen, Denmark.
L. Lescourret, ESSEC Business School, France.
D. Kristensen, University College London & CRETAES, the UK.
K. Lansing, Federal Reserve Bank of San Francisco, the USA.
E. Maasoumi, Emory University, the USA.
J. Mairesse, ENSAE (CREST) and MIT, France.
N. Meddahi (Toulouse School of Economics, France).
B. Mizrach, Rutgers University, the USA.
D. Peel, Lancaster University, the UK.
J. Racine, McMaster University, Canada.
S. Reitz, University of Kiel, Germany.
B. Rossi, University of Pompeu Fabra, Spain.
Ph. Rothman, East Carolina University, the USA.
Ph. Rozin, IAE Lille University of Management, France.
L. Sarno, University of Cambridge, the UK.
O. Scaillet, University of Geneva and Swiss Finance Institute, Switzerland.
R. Sousa, University of Minho & LSE, Portugal.
G. Talmain, University of Glasgow, the UK.
M. P. Taylor, Washington University in St Louis, the USA.
T. Teräsvirta, Aarhus University, Denmark.
E. Theissen, University of Mannheim, Germany.
H. Tong, London School of Economics, the UK.
R. Tsay, University of Chicago, the USA.
R. Uctum, University of Paris West, & CNRS, France.
R. Uppal, EDHEC Business School, the UK.
D. Van Dijk, Erasmus University of Rotterdam, The Netherlands.
R. Valkanov, University California, San Diego, The USA.
J. C. Wu, University of Notre Dame, the USA.
Important Dates:

Deadline for submission: **February 28, 2023.**
Notification of final decision: **March 15, 2023.**
Author Registration: **March 15, 2023 - April 15, 2023.**
Dates of the workshop: **June 1-2, 2023.**

Publication Opportunities:

A selection of papers presented at the 7th FMND workshop will be considered for publication in:
- a special issue of *Computational Economics.*
- a special issue of *International Economics.*
- a special issue of *Macroeconomic Dynamics.*
- a special issue of *Review of Quantitative Finance and Accounting.*
- a special issue of *Studies in Nonlinear Dynamics and Econometrics.*
